Navigating Through the Requirements for the MA Programs

Dominican School of Philosophy & Theology
Overview

By the end of this workshop you should understand:

The importance of

➢ DSPT Student Handbook

In a general way, that each MA program has

➢ Particular goals and outcomes
➢ Core requirements and “variable” elements
➢ Unique and common means of assessing your progress

How to integrate your decision-making by knowing:

➢ The way core and “variable” elements work together with
➢ DSPT/GTU Faculty resources
➢ DSPT/GTU academic and student services resources
➢ the way to coordinate all of these elements into an overarching plan for completing your thesis in the proposed time period.
Program Requirements

- Program Goals and Outcomes
  - Help you understand what will be offered to you and expected from you
  - ALWAYS REFER TO THE DSPT STUDENT HANDBOOK (your other bible!)

- Degree Requirements, e.g. DSPT MA (Theology), Thesis Option
  - Area of Concentration
  - Core courses
  - Electives
  - Evaluative tools, e.g. exams, grades, DSPT portfolio elements, thesis
Program Requirements

Choosing Electives

- Core requirements help build broad knowledge base
  - Distribution requirements (know the nomenclature for courses at GTU)
  - See list of DSPT courses: [https://www.dspt.edu/syllabi-and-course-information](https://www.dspt.edu/syllabi-and-course-information)
  - SPECIAL THIS YEAR... for those interested in Christian-Islamic philosophy

- Electives build upon core requirements. When choosing electives, consider:
  - Selecting topics that help you explore area(s) of interest related to thesis
  - For MATH: select an area of concentration
    - Take at least four courses from the area)
    - at least two are 4000-level
  - SRC are useful, but remember that Faculty do not receive remuneration
Certification in Foreign Language Proficiency

➢ Not just a hoop! Consider it as a research tool for thesis work

➢ May be fulfilled by:
  ➢ Approved GTU/UCB coursework (summers)
  ➢ GTU examination (offered Sep, Feb, or May)
  ➢ [Prior coursework approved by petition of Dean]

➢ DEADLINE for DSPT students: by the beginning of 3rd semester

➢ RESOURCES: GTU Library Reference Desk has sample/practice exams
Program Requirements

Research Readiness Paper Review (RRP Review)

PURPOSE: Demonstrate/assess your skills for doing graduate-level research

➢ choose a course now and get permission from instructor
➢ complete paper by end of 1\textsuperscript{st} semester in program
Understanding “In Thesis” Units

Purpose of “In Thesis”

➢ to create space in your personal schedule committed to classroom & homework
➢ thereby allowing a structure which meets your needs for research & writing.

To get the most of “In Thesis” units, first consider

➢ What is your level of comfort/skill for academic research & writing? [RRP Review; otherwise, DSPT students: consider taking MA 1000, “GTU MA Research Methods”]
➢ Do you want/need extra time to research and write the thesis proposal?
➢ Do you want/need extra time to utilize GTU Library resources, e.g. meet w/ research librarian, attend Library workshops, etc.
➢ SPECIAL OPPORTUNITY THIS YEAR... 2 non-credit workshops offered by DSPT Faculty
Understanding “In Thesis” Units

Take “In Thesis” in a way which suits your needs

➢ Plan and commit to a regular schedule of research equivalent in time to the amount of hours spent on a 3-unit course. For example:
  ➢ 3 units over two semesters (minimum of 9 hours/week)
  ➢ 6 units in one semester (minimum of 18 hours/week)
  ➢ Finish 3 units of “In Thesis” by 3rd semester, i.e. it is not recommended to take all 6 units in last semester

➢ “In continuation” – a status available for students who have completed “tuition residency” requirement, i.e. paid for 48 semester units of tuition, and who need longer time to complete their thesis.
The Thesis Proposal

Purpose of the Thesis Proposal

➢ demonstrate your ability to organize your thoughts on a topic into a *brief & coherent scholarly* statement.

➢ Key to a “Successful” Proposal
Consult either the DSPT “Thesis Proposal Guidelines” or the GTU MA Handbook.
DSPT MA students must submit the Thesis Proposal Petition

➢ Watch for workshop(s) related to the proposal to be offered in S2020 as Part 2 of WS 1000

➢ Plan to do *significant consulting* with the proposed thesis coordinator – which implies that you’ve been scouting out possibilities. Find a faculty person who “matches”
  o **Academic expertise:** must match your research interests (may/not be advisor)
  o **Professional expertise:** in publishing, academic leadership, etc.
  o **Pedagogical style:** the person must work well *for you*; *are you willing to be guided?!*
The Thesis Proposal

Leave enough time to do several re-writes before the proposal is due

- Review samples available from DSPT Registrar
- Submit rough draft to proposed thesis coordinator for feedback
- Submit revised version to other suggested readers
- For DSPT students: submit final version to department chair (or Dean for Concurrent students) one week prior to scheduled meeting of the department(s)
Once the proposal has been approved,

DON’T HIDE! Rather, take the initiative to

➢ Work *closely & regularly* with your thesis coordinator (who is now also your advisor)
➢ Don’t assume you know what s/he expects
➢ Take advantage of their expertise to assist you in focusing your ideas and helping you find useful resources

Understand the thesis format guidelines on two levels:
➢ Content (see DSPT “Thesis Review Form”)
➢ Format ... *this* is the person you ought to fear 😊 ...(see GTU “Master’s Thesis Guidelines”)
By establishing & maintaining clear expectations with all other committee members . . .

➢ Ensure each member is “on board” with your ideas and research approach;
➢ Ensure you understand everyone’s preferences: “hands on” or “hands off”

You can avoid being surprised at your defense

➢ Not merely a “test,” the defense is an opportunity to demonstrate your skills in oral communication and for dialog with other professionals in your field
➢ The questions asked by committee members should never be about fundamental flaws in your research design and/or conclusions (which should be addressed well beforehand)
Summary - Developing General Principles

1. Understand how component pieces work together
   - required courses – distribution and, as relevant, area of concentration
   - electives
   - foreign language proficiency
   - thesis proposal (DSPT MA)/Thesis Committee Request Form (GTU MA)

2. You are in charge, so take the initiative to
   - Articulate your goals and expectations
   - Determine your academic & research interests
   - Evaluate your academic strengths & weaknesses
   - Be familiar with thesis writing guidelines
   - Be familiar with program requirements, posted deadlines, etc.
Some General Principles

3. It’s never too early to . . .

➢ Begin thinking about your thesis topic
  o What is of interest to me?
  o Where do my interests intersect with faculty expertise?
  o What are my long-term interests and goals?

➢ Engage the skill and wisdom of your faculty advisor

➢ Demonstrate foreign language proficiency – *it’s more than just a hoop!*

➢ Find a possible thesis coordinator
Develop a Time Line That’s Yours

Know & anticipate deadlines (consult Handbooks & calendars)

Have alternative plan(s), e.g. can’t meet April 1st deadline, so . . .

Understand the *Ultimate Deadline*: “Thesis Filing/Oral Exam Extension Agreement” (Handbook, p. 32) ... close of late reg. period

</tbody>
</table>

**ATTEND JANUARY WORKSHOP ON MA THESIS PROPOSAL**

- Continue with coursework
- Submit proposal for approval (Sep/Nov)
- "In Thesis" work

**Defend (2 weeks before published deadline [4/1])**

- File "Graduation Checklist" by published deadline
- File completed thesis by published deadline OR extend
